# WILLIAMSON COUNTY, TEXAS CHANGE ORDER NUMBER: 1

1. CONTRACTOR: Smith Contracting		Project: 24IFB19						
2. Change Order Work Limits: Sta. 1099+71.31 to	Sta. 1133+50.00	Roadway: <u>E Wilco Hwy</u>						
3. Type of Change(on federal-aid non-exempt projects):	<u>Minor</u> (Major/Minor)	CSJ Number: <u>N/A</u>						
4. Reasons: 3F (3 Max In order o	f importance - Primary first)							
5. Describe the work being revised:								
<b>3F. Additional work desired by the County.</b> This Change Order compensates the Contractor for the installation of additional signs to the project to increase the safety along the roadway as well as addressing the roadway name change. This Change Order also adds a pedestrian handrail to increase the safety along a section of the shared use path, and adds a line item for law enforcement presence during nighttime lane closure operations at the intersection of CR 138 and SH 130.								
6. Work to be performed in accordance with Items: See	Attached							
7. New or revised plan sheet(s) are attached and numbered	14A,135A,135B,1	53A,153B,153C,153D,153E						
8. New Special Provisions/Specifications to the contract are	attached: D Yes	⊠ No						
9. New Special Provisions to Item_N/A_ NoN/A_, Special	al Specification Item <u>N/A</u>	_are attached.						
Each signatory hereby warrants that each has the authority	to execute this Change Orde	er (CO).						
The contractor must sign the Change Order and, by doing so, agrees to waive	The following informa	ation must be provided						
any and all claims for additional compensation due to any and all other expenses; additional changes for time, overhead and profit; or loss of compensation as a result of this change.	Time Ext. #:0	Days added on this CO: 0						
THE CONTRACTOR Date 4/25/2024	Amount added by this char	nge order: \$29,920.92

## CHANGE ORDER REASON(S) CODE CHART

1. Design Error or Omission	1A. Incorrect PS&E
	1B. Other
2 Differing Site Conditions	2A. Dispute resolution (expense caused by conditions and/or resulting delay)
2. Differing Site Conditions	
(unforeseeable)	
	2C. New development (conditions changing after PS&E completed)
	2D. Environmental remediation
	2E. Miscellaneous difference in site conditions (unforeseeable)(Item 9)
	2F. Site conditions altered by an act of nature
	2G. Unadjusted utility (unforeseeable)
	2H. Unacquired Right-of-Way (unforeseeable)
	2I. Additional safety needs (unforeseeable)
	2J. Other
3. County Convenience	3A. Dispute resolution (not resulting from error in plans or differing site conditions)
5. County convenience	3B. Public relations improvement
	3C. Implementation of a Value Engineering finding
	3D. Achievement of an early project completion
	3E. Reduction of future maintenance
	3F. Additional work desired by the County
	3G. Compliance requirements of new laws and/or policies
	3H. Cost savings opportunity discovered during construction
	3I. Implementation of improved technology or better process
	3J. Price adjustment on finished work (price reduced in exchange for acceptance)
	3K. Addition of stock account or material supplied by state provision
	3L. Revising safety work/measures desired by the County
	3M. Other
4. Third Party Accommodation	4A. Failure of a third party to meet commitment
4. Third Farty Accommodation	4B. Third party requested work
	4C. Compliance requirements of new laws and/or policies (impacting third party)
	4C. Compliance requirements of new laws and/or policies (impacting third party) 4D. Other
5. Contractor Convenience	5A. Contractor exercises option to change the traffic control plan
	5B. Contractor requested change in the sequence and/or method of work
	5C. Payment for Partnering workshop
	5D. Additional safety work/measures desired by the contractor
	5E. Other
6. Untimely ROW/Utilities	6A. Right-of-Way not clear (third party responsibility for ROW)
	6B. Right-of-Way not clear (County responsibility for ROW)
	6C. Utilities not clear
	6D. Other

### Williamson County Road Bond Program

### CR 138 Right Turn Lane at SH 130 Williamson County Project No. 24IFB19

### Change Order No. 1

### Reason for Change

This Change Order adds additional signs to the project to increase the safety along the roadway and updates the roadway street name signs from CR 138 to East WilCo Hwy. This Change Order also adds a pedestrian handrail to increase the safety along a section of the shared use path where the slope is too steep, due to the limited ROW.

Lastly, the Change Order adds a line item for law enforcement presence during nighttime lane closure operations at CR 138 and SH 130. Due to the amount of traffic and the location of the project, it was determined that this would be the safest most effective way to perform the final paving operation.

ITEM	DESCRIPTION	QTY	UNIT
450-6052	RAIL (HANDRAIL)(TY F)	1.0	LS
644-6001	IN SM RD SN SUP&AM TY10BWG(1)SA(P)	2.0	EA
644-6033	IN SM RD SN SUP&AM TYS80(1)SA(U)	2.0	EA
690-6029	INSTALL OF SIGNAL RELATED SIGNS	2.0	EA
999-WC02	REMOVE & REPLACE EXISTING SIGN	6.30	SF
999-WC03	LAW ENFORCEMENT - TRAFFIC CONTROL	1.0	LS

Following is a summary of new items required for this Change Order.

This Change Order results in a net increase of \$29,920.92 to the Contract amount, for an adjusted Contract total of \$1,778,859.67. The original Contract amount was \$1,748,938.75. As a result of this and all Change Orders to-date, \$29,920.92 has been added to the Contract, resulting in an 1.71% net increase in the Contract cost. No additional days will be added to or deducted from the Contract as a result of this Change Order.

### HNTB Corporation

Oscar Salazar-Bueno, P.E.

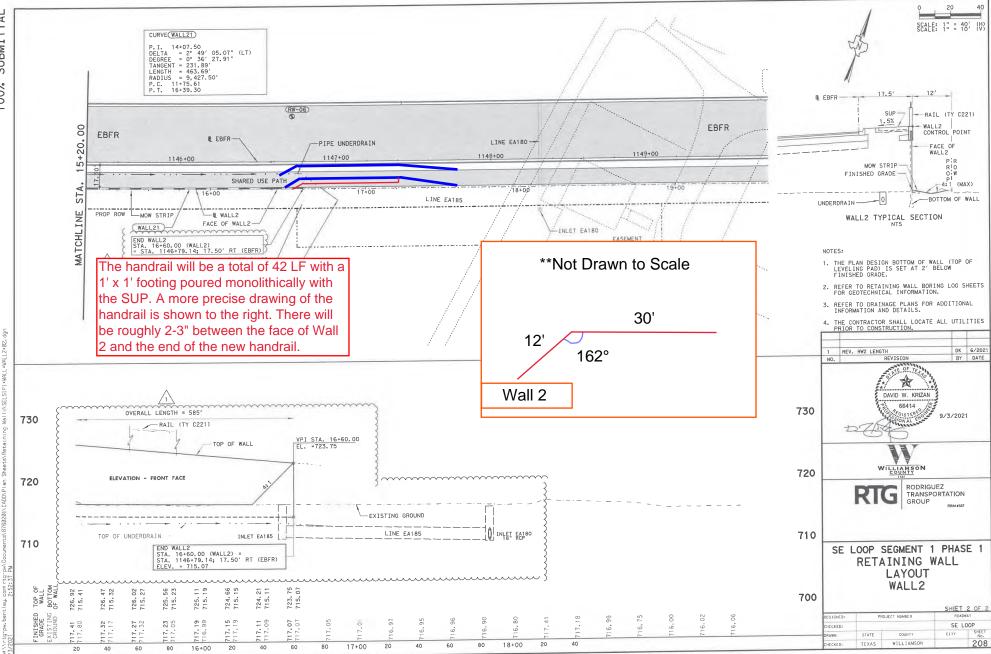

#### PROJECT: CR 138 Right Turn Lane at SH 130 4/18/2024

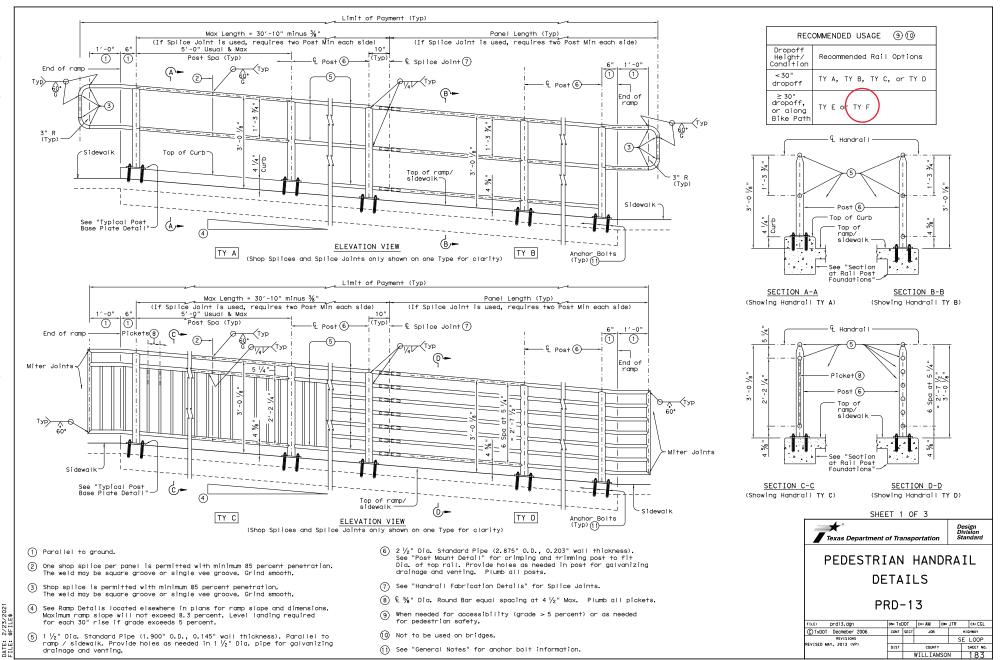

## DATE: DESCRIPTION:

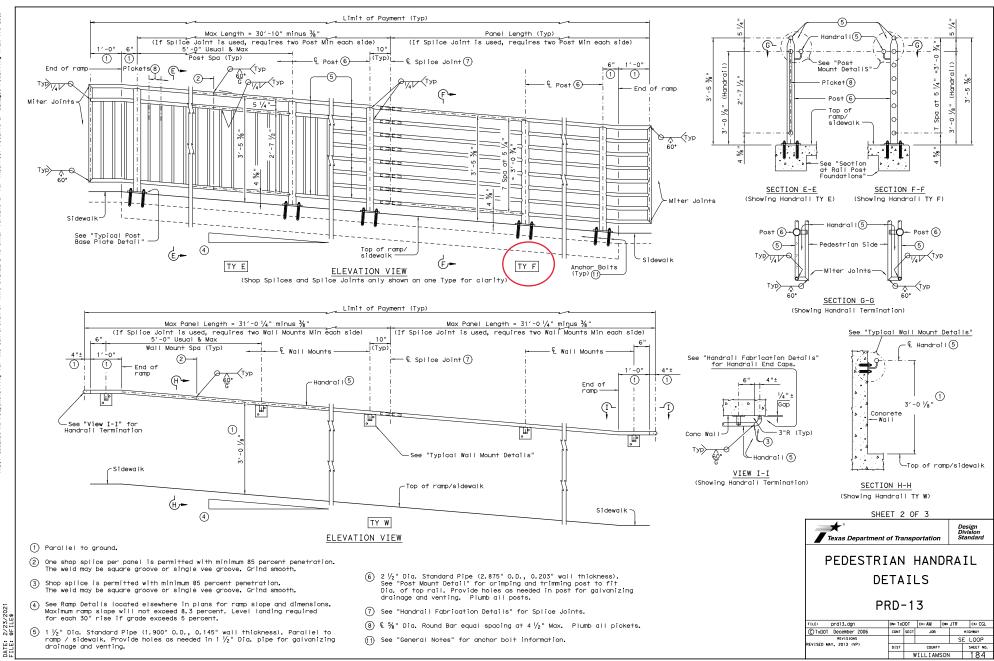

This proposal is for the addition of 42LF of TxDOT Ty F Pedestrian Railing. Expected lead time for fabrication of railing is 16 weeks from the time of approved shop drawings. Proposed cost for installation of new ped-rail is \$11,804.71.

Letting Date:	04/08/2024	Engineer:	
Phone No:		-	

We are pleased to offer the following proposal for your consideration:

Item No	Item Description	Qty	Unit	Unit Price (\$)	Total Price (\$)
0450 2077	RAIL (HANDRAIL)(TY F)	42.00	LF	153.60	6,451.20
				Total Bid Price:	6,451.20

Notes

Price is based on shipping in complete quantities to the jobsite with unloading, storage and erection by others. Less than complete quantities, may incur additional freight charges. This quote is for the the complete package as quoted, any deletion of a bid line item on this quote, may result in additional charges for the remaining material.

Price does not include any radius rail.

Prices good for material delivered on or by 9/30/2024. After which are subject to escalation.

Lead Time: 16 weeks

### Terms & Conditions:

This proposal is subject to Structural & Steel Products terms and conditions. Please request a copy by calling (817)332-7417

Payment Terms are Net 30 Days, no retainage, subject to credit approval

Prices are firm 30 days from the quote date and shipment within 60 days of order acceptance, after which prices subject to escalation.

Project Expiration:

9/30/2024

#### Additional Costs and Terms:

page 2 of 2

•Lauren Concrete reserves the right to revise quote if not signed and returned within 30 days and/or if project start date is more than 90 days out. Availability of raw materials is expected to be limited. When shortages occur, straight cement concrete designs may be substituted at a minimum charge of \$4.00 per yard. Dolomite Limestone will be substituted at a minimum charge of \$3.00/yd3.

•Pours outside of normal operating hours may be subject to a plant opening fee and are subject to availability. TXDOT hour restrictions strictly observed.

•Fuel Surcharge: A fuel surcharge of \$10.00 per load will be charged when area diesel prices are \$3.25 - \$3.49. A surcharge of \$16.00 per load will be charged while diesel prices are \$3.50 - \$3.74. An additional \$6.00 per load will be charged for every \$0.25 per gallon increase over \$3.75 per gallon diesel. A complete schedule of fuel surcharges by diesel price is available upon request. The diesel price (On-highway Ultra Low Sulfur Diesel) as posted by the U.S. Energy Information Administration for the Gulf Coast area (PADD3) shall be used as the benchmark. https://www.eia.gov/petroleum/gasdiesel/

•Non-Chloride Accelerator Admixture, Level 1 - \$5.00 per yard, Level 2 - \$10.00 c.y., Level 3 - \$15.00 c.y.

•The slumps listed for each individual mix design are the acceptable ranges warranted by Lauren Concrete. The contractor must request a slump for each order that is within the published Lauren Concrete range (per design) as well as respecting conformance to this job's specification(s) and this project's structural notes.

•Concrete Cooling - Pricing on Request.

•Minimum load size 3 cy. Minimum Load Charge: 3 - 5.99 yards = \$275.00

• Rejected loads will be assessed individually to determine charges to customer. Lauren Concrete has the right to invoice and collect on all rejected loads that have not been independently tested using ASTM methods.

• Maximum Allowable Truck Time - 60 minutes from arrival time until finish pour out time allowed. \$3.00 per min. charge will apply beyond the allowed time.

• Pricing listed is specific to the project and mix designs indicated above. Additional Concrete Mix Designs will be quoted separately as needed.

•Quality Control – Engineered Stamped Mix Design, \$100.00/Mix; Additional Testing Required/ Specifications, quoted separately as needed, i.e., (shrinkage test, 1 day, 2 day break reporting etc.).

Environmental Fee: \$10.00 per truck

•As of October 1, 2020 - payments on credit accounts are subject to a 3% convenience fee when the payment is made by credit card.

•When requested, a 9 sack grout mix (40XEA7IP3X1) will be added to the project as a pump prime for \$250 per cubic yard.

•Effective January 1, 2023 – Arrival at jobsite combined with an electronic ticket will serve as proof of delivery. Loads not accepted must be electronically rejected.

### Bid Date: April 18, 2024

Project: CR 138 Right Turn Lane at SH-130

For: Williamson County

## Environmental Safety Services proposes to provide all the materials, labor, equipment and supervision necessary to perform the following work at the above referenced project per plans and specifications.

ITEM #	DESCRIPTION	UNIT	QUANTITIES	BID PRICE	EXT. PRICE
1	Signs for Street Name Blades with Applicable Hardware	EA	4.00	\$187.50	\$750.00
I	(Caps, Crosses)		4.00	\$10.50	\$7.00.00
	Derby Day (38"x8") & East Wilco Hwy (48"x8")				
	Little Lake (40"x8") & East Wilco Hwy (48"x8")				
				TOTAL	\$750.00

Notes:

All permits, lane closures and traffic control are excluded.

All layout is excluded.

General Contractor to provide access and staging area for ESSI materials & equipment.

If any material tests are required they shall be done by the GC or others.

All maintenance is excluded.

Sign prices are based on same move-in with additional CO signs, or a \$350.00 mobilization

charge will apply. No temporary signs/mounts, covering or turning of signs, solar or electrical is included.

Overhead signs will be provided by ESSI for installation by others.

Sign relocation pricing reflects new stubs only. If new posts or signs are needed, additional charges will apply.

Aluminum signs type A price reflects ESSI providing the signs for installation by others.

All shoring and mass excavation are excluded.

All dewatering is excluded.

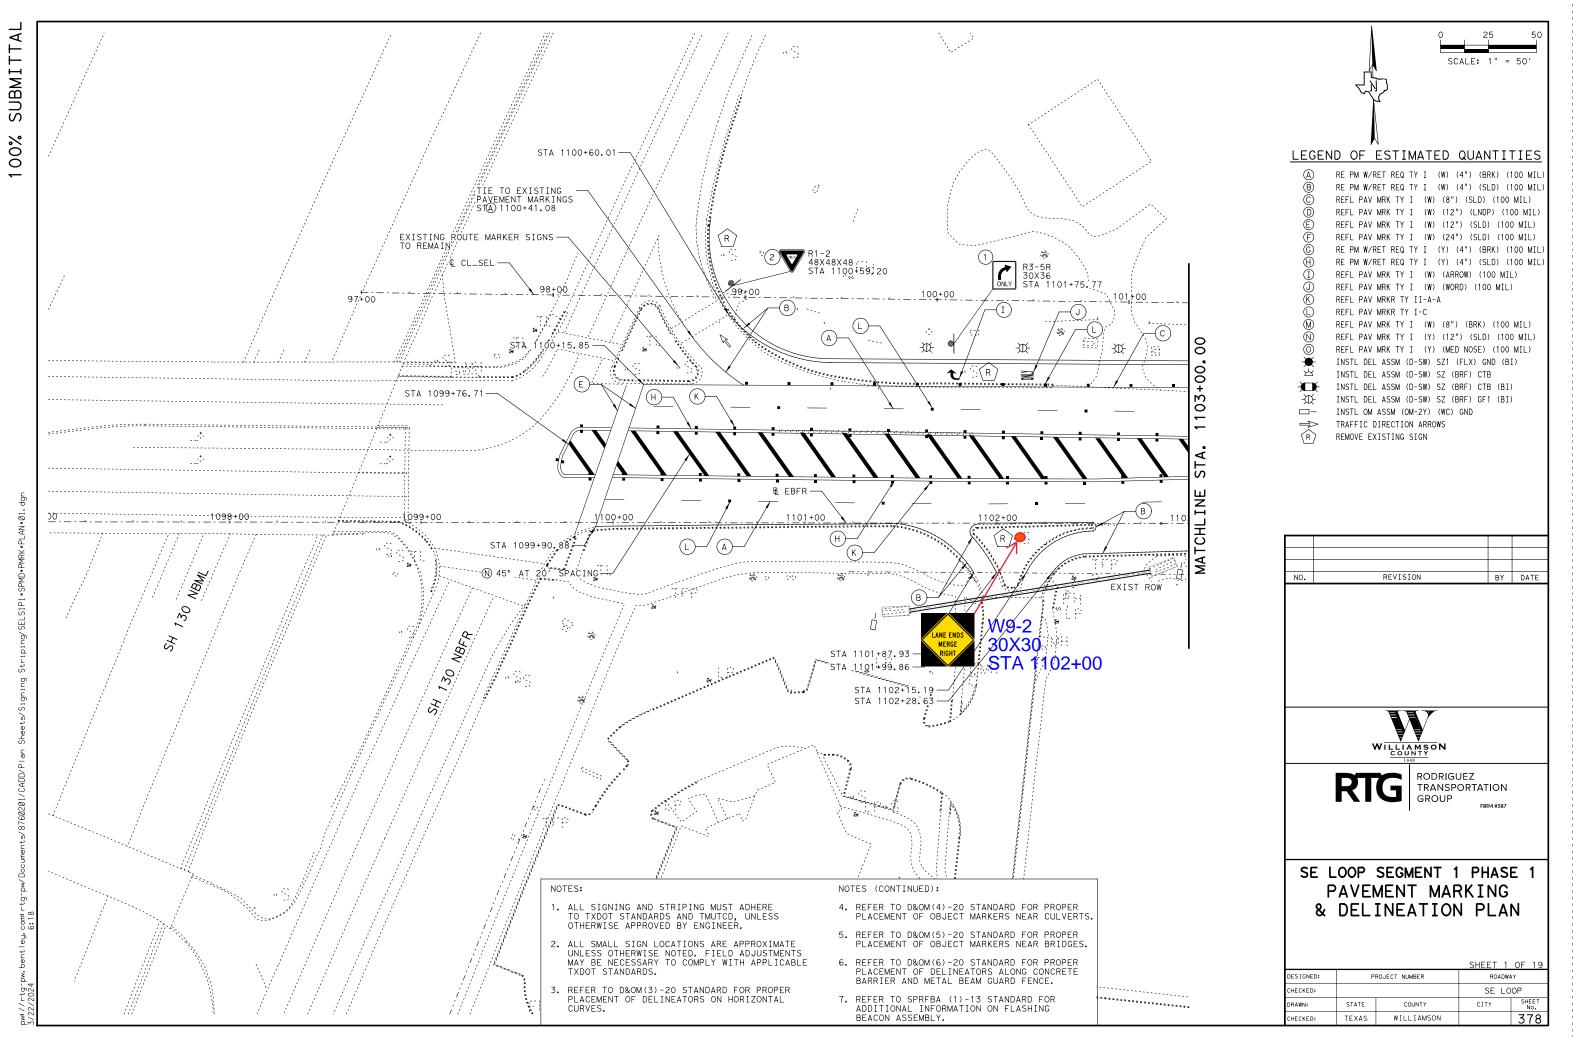

### Pricing is good for thirty (30) days.

\*\*\*\*\*All bid prices are negotiable.\*\*\*\*\*

Project Name:INSTALL MASTARM SIGNSJob Location:GATTIS SCHOOL ROADOwner:WILLIAMSON COUNTY

We at G Carter Construction Co., Inc. are pleased to quote the bid items below on the referenced project:

2.0	EA	\$ 2,100.00	\$ 4,200.00
		¢	4,200.00
	2.0 TOTAL		

These prices do not include any Bond, Traffic Control or Engineering. If Bond is required, the General Contractor will add 3 1/2% to the bid. These prices are contingent on being awarded all items bid.

## G Carter Construction Company Inc is a State Certified WBE, DBE, SBE & HUB.

If this bid is accepted, it becomes a part of the contract. This quote is good for 30 days from date of this letter.

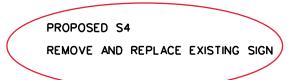

If additional information is needed, please contact me at (512) 258-1025.

Sincerely,

Pete Smith

or F).

DISCLAIMER: The use of this standard is governed by the "Texas Engineering Practice Act". No warranty of any Kind is made by TXDOT for any purpose wharsoever. TXDOT assumes no responsibility for the conversion of this standard to other formats or for incorrect results or damages resulting fram its use.

1. Signs to be furnished shall be as detailed elsewhere in the plans and/or as shown on sign tabulation sheet. Standard sign designs and arrow dimensions can be found in the "Standard Highway Sign Designs for Texas" (SHSD).

2. White legend shall use the Clearview Alphabet. The following Clearview fonts shall be used to replace the existing white Federal Highway Administration (FHWA) Standard Highway Alphabets, when not specified in the SHSD, or in the

В	CV-1W
С	CV-2W
D	CV-3W
E	CV-4W
Emod	CV-5WR
F	CV-6W

3. Route sign legend (ie. IH, US, SH and FM shields) shall use the Federal Highway Administration (FHWA) Standard Highway Alphabets B, C, D, E, Emod

4. Lateral spacing between letters and numerals shall conform with the SHSD, and any approved changes thereto. Lateral spacing of legend shall provide a balanced appearance when spacing is not shown.

5. Independent mounted route sign with white or colored legend and borders shall be applied by screening process with transparent color ink, transparent colored overlay film to white background sheeting or cut-out white sheeting to colored background sheeting, or combination thereof. White legend, symbols and borders on all other signs shall be cut-out white sheeting applied to colored background sheeting.

6. Information regarding borders and radii for signs is found in the "Standard Highway Sign Designs for Texas". Dimensions shown and described for borders and corner radii on parent sign are nominal. Borders may vary in width as much as 1/2 inch. Corner radii above 3 inches may vary in width as much as 1 inch. Borders and corner radii within a parent sign must be of matching widths. The sign area outside the corner radius should be trimmed or rounded.

7. Sign substrate shall be any material that meets the Departmental Material Specification requirements of DMS-7110 or approved alternative.

8. Mounting details of roadside signs are shown in the "SMD series" Standard Plan Sheets.

### TRIANGULAR SLIPBASE INSTALLATION GENERAL REQUIREMENTS

### NOTE

There are various devices approved for the Triangular Slipbase System. Please reference the Material Producer List for approved slip base systems. http://www.txdot.gov/business/producer list.htm The devices shall be installed per manufacturers' recommendations. Installation procedures shall be provided to the Engineer by Contractor.

### GENERAL NOTES:

- 10 BWG Tubing (2.875" outside diameter)
- 0.134" nominal wall thickness
- - 55,000 PSI minimum yield strength
  - 70,000 PSI minimum tensile strength 20% minimum elongation in 2"

- Schedule 80 Pipe (2.875" outside diameter) 0.276" nominal wall thickness
- Steel tubing per ASTM A500 Gr C
- 46,000 PSI minimum yield strength 62,000 PSI minimum tensile strength
- 21% minimum elongation in 2"
- Galvanization per ASTM A123

### ASSEMBLY PROCEDURE

### Foundation

- direction.

### Support

Concrete anchor consists of 5/8" diameter stud bolt with UNC series bolt threads on the upper end. Heavy hex nut per ASTM A563, and

hardened washer per ASTM F436. The

yield and ultimate tensile strength of 50 and 75 KSI, respectively. Nuts, bolts and washers shall be galvanized per Item 445, "Galvanizing." Adhesive type anchors shall have stud bolts installed with Type III epoxy per DMS-6100, "Epoxies and Adhesives, " Adhesive anchors may be loaded after adequate epoxy cure time per the manufacturer's recommendations. Top of bolt shall extend at least flush with top of the nut when installed. The anchor,

when installed in 4000 psi normal-

minimum embedment, shall have a

minimum allowable tension and shear

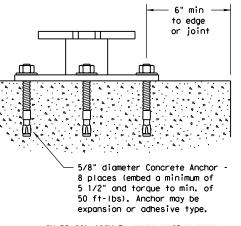

of 3900 and 3100 psi, respectively.

weight concrete with a 5 1/2"

stud bolt shall have a minimum

- straight.
- clearances based on sign types.

### CONCRETE ANCHOR

SM RD SGN ASSM TY XXXXX (X) SB (X-XXXX)

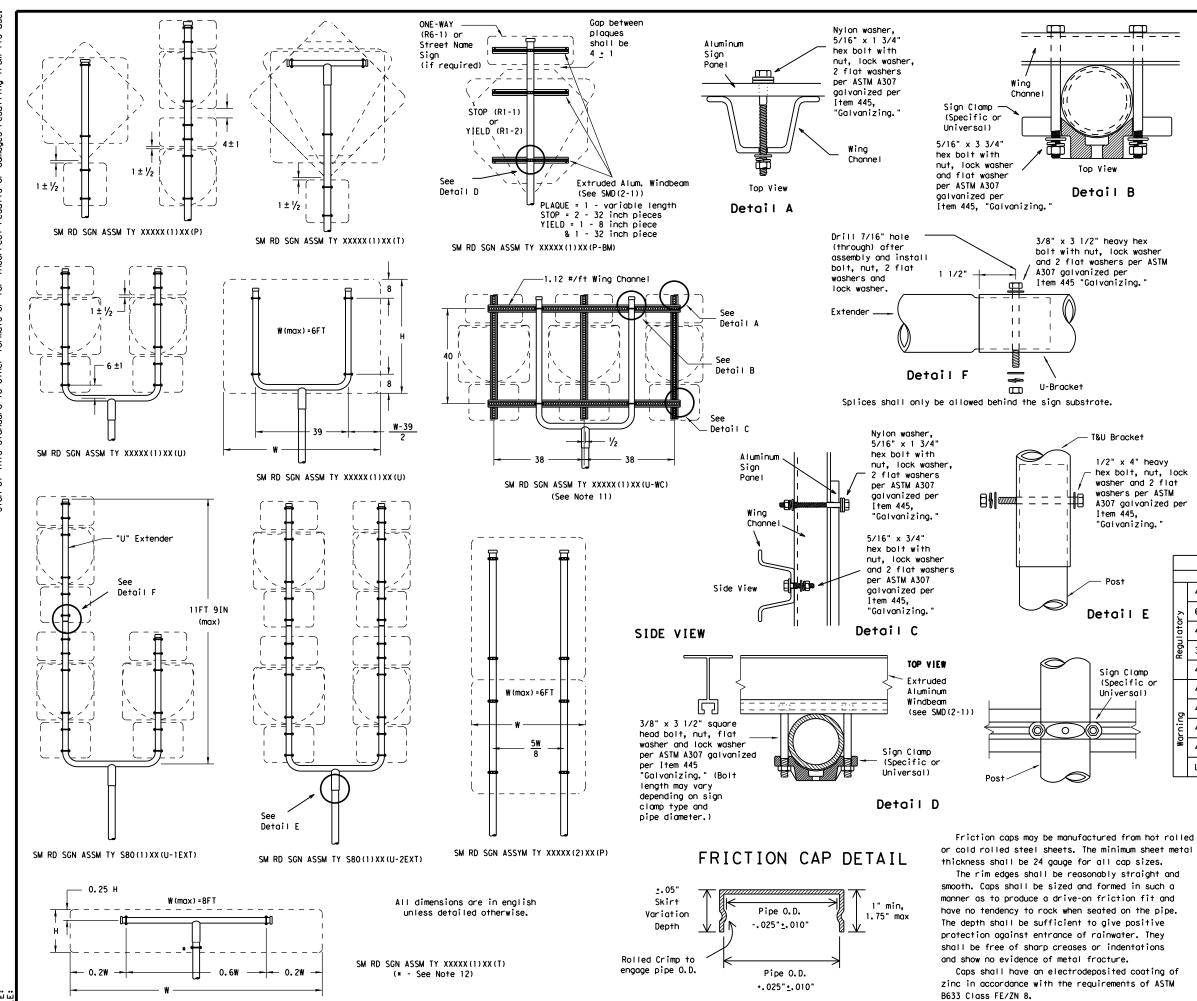

1. Slip base shall be permanently marked to indicate manufacturer. Method, design, and location of marking are subject to approval of the TxDOT Traffic Standards Engineer. Material used as post with this system shall conform to the following specifications: Seamless or electric-resistance welded steel tubing or pipe Steel shall be HSLAS Gr 55 per ASTM A1011 or ASTM A1008 Other steels may be used if they meet the following: Wall thickness (uncoated) shall be within the range of 0.122" to 0.138" Outside diameter (uncoated) shall be within the range of 2.867" to 2.883" Galvanization per ASTM A123 or ASTM A653 G210. For precoated steel tubing (ASTM A653), recoat tube outside diameter weld seam by metallizing with zinc wire per ASTM B833. Other seamless or electric-resistance welded steel tubing or pipe with equivalent outside diameter and wall thickness may be used if they meet the following: Wall thickness (uncoated) shall be within the range of 0.248" to 0.304" Outside diameter (uncoated) shall be within the range of 2.855" to 2.895" 3. See the Traffic Operations Division website for detailed drawings of sign clamps and Texas Universal Triangular Slipbase System components. The website address is: http://www.txdot.gov/publications/traffic.htm 4. Sign supports shall not be spliced except where shown. Sign support posts shall not be spliced.

1. Prepare 12-inch diameter by 42-inch deep hole. If solid rock is encountered, the depth of the foundation may be reduced such that it is embedded a minimum of 18 inches into the solid rock. 2. The Engineer may permit batches of concrete less than 2 cubic yards to be mixed with a portable, motor-driven concrete mixer. For small placements less than 0.5 cubic yards, hand mixing in a suitable container may be allowed by Engineer. Concrete shall be Class A. 3. Push the pipe end of the slip base stub into the center of the concrete. Rotate the stub back and forth while pushing it down into the concrete to assure good contact between the concrete and stub. Continue to work the stub into the concrete until it is between 2 to 4 inches above the ground. 4. Plumb the stub. Allow a minimum of 4 days to set, unless otherwise directed by the Engineer. 5. The triangular slipbase system is multidirectional and is designed to release when struck from any

1. Cut support so that the bottom of the sign will be 7 to 7.5 feet above the edge of the travelway (i.e., edge of the closest lane) when slip plate is below the edge of pavement or 7 to 7.5 feet above slip plate when the slip plate is above the edge of the travelway. The cut shall be plumb and

2. Attach sign to support using connections shown. When multiple signs are installed on the same support, ensure the minimum clearance between each sign is maintained. See SMD(SLIP-2) for

#### GENERAL NOTES:

1.	SIGN SUPPORT	# OF POSTS	MAX. SIGN AREA
	10 BWG	1	16 SF
	10 BWG	2	32 SF
	Sch 80	1	32 SF
	Sch 80	2	64 SF

2. The Engineer may require that a Schedule 80 post be used in place of a 10 BWG where a sign height is abnormally high due to a fill slope.

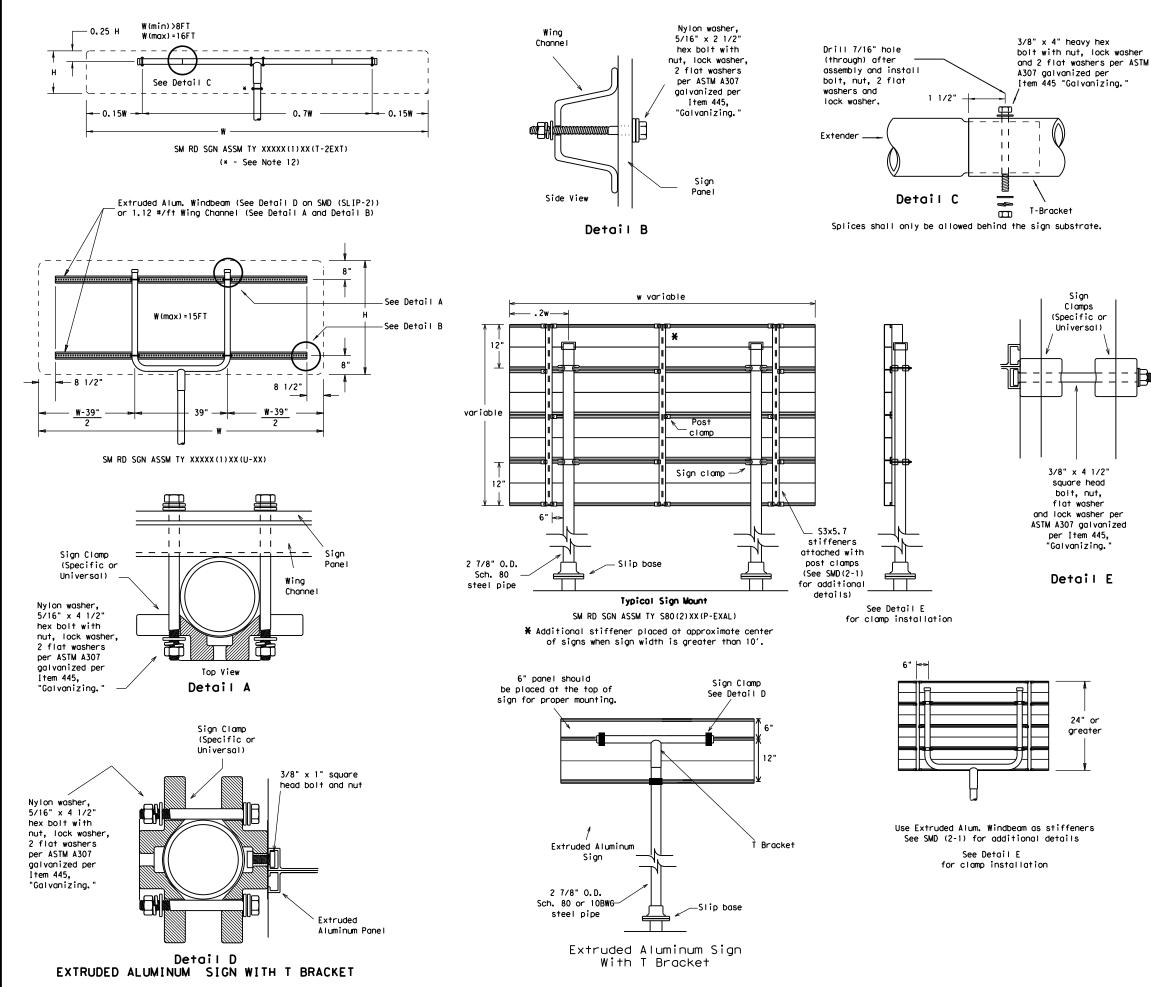

- 3. Sign supports shall not be spliced except where shown. Sign support posts shall not be spliced.
- Aluminum sign blanks shall conform to Departmental Material Specifications DMS-7110 and shall have the following minimum thicknesses: 0.080 for signs less than 7.5 sq. ft., 0.100 for signs 7.5 to 15 sq. ft., and 0.125 for signs greater than 15 sq. ft.
- 5. Signs that require specific supports due to reasons in addition to windloading are indicated on the "REQUIRED SUPPORT" table on this sheet.
- 6. For horizontal rectangular signs fabricated from flat aluminum, T-brackets are used for signs 24 inches or less in height. U-brackets are used for signs of greater height. 7. When two triangular slipbase supports are used to
- support a single sign, they shall not be "rigidly" connected to each other except through the sign panel. This will allow each support to act independently
- when impacted by an errant vehicle. 8. Wing channel shall meet ASTM A 1011 SS Gr 50 and be galvanized per ASTM A 123.
- Excess pipe, wing channel, or windbeam shall be cut off so that it does not extend beyond the sign panel (i.e., excess support shall not be visible when the sign is viewed from the front.) Repair galvanized coating at cut support ends per Item 445, "Galvanizing."
- 10. Additional route markers may be added vertically, provided the total sign area does not exceed the maximum allowable amount per Note 1.
- 11. Additional sign clamp required on the "T-bracket" post for 24 inch height signs. Place the clamp 3 inches above bottom of sign when possible.
- 12. Post open ends shall be fitted with Friction Caps. 13. Sign blanks shall be the sizes and shapes shown on the plans.

### WING CHANNEL CLAMP DETAIL FOR TYPE G MOUNT

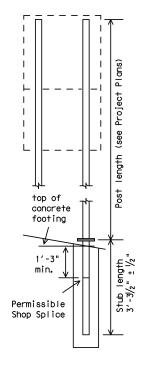

Galvanized steel or aluminum self-locking hex. head nut. 3/8 " -  $16 \times 3/4$  " hex. head bolt for sheet metal. 3/8 " -  $16 \times 11/4$  " hex. head bolt for plywood. 3/8 " galvanized medium washer.

DETAIL "C"

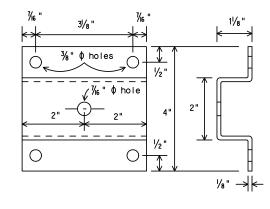

The weight of one S4x7.7 post is equal to 112.2 lbs. plus 7.7 lbs./ft x (post length in feet minus 10 ft). The weight of 112.2 lbs. includes 10 feet of post length, post foundation stub, related connection plates, friction fuse plate, and all high strength bolts, nuts and washers. 30' or more desirable. May be reduced depending on cross section, viewing conditions and other related factors.

This type mount to be used:

(1) For SPEED LIMIT sign (R2-1) when used in combination with R2-2 and R2-4 or for R2-2A.

(2) For DO NOT ENTER sign (R5-1 when used with WRONG WAY sign (R5-1a). R5-1a is mounted above R5-1.

### WING CHANNEL

Wing channel, 4" width x  $1/_8$ " depth x  $1/_8$ " thickness, shall be aluminum (ASTM B221 6061-T6 or B308 6061-T6), galvanized steel (ASTM A36) or stainless steel (ASTM A167 type 304, No. 2B finish).
