APPENDIX A – Scope of Services
Bluebonnet Trails Community Services
Residential Withdrawal Management Center (Detox Program)

Major activities of this investment include:

Progress and data collected through fiscal year 2024 will support the application to HHSC for a financially sustained program at the San Gabriel Crisis Center.

Goal 1: Support recovery from intensive substance addiction and avoid relapse through:

- 24/7 medical care to manage withdrawal symptoms and psychiatric conditions.
- Psychological treatment of addiction and co-occurring mental disorders.
- Learning and coping skills to avoid relapse and maintain recovery.
- Motivating peers who have been through treatment, offering lived experience leading to a substance-free lifestyle.
- A structured environment with scheduled days with therapy and counseling supporting a healthier lifestyle and home network to which the participant will return.
- Nutritional guidance improving diet and restoring deficient vitamins and nutrients.
- Healthy activities improving physical and mental wellbeing.

Goal 2: Serve 80 adults during the first 12 months of operation referred by Williamson County health care, courts and law enforcement partners.

Goal 3: Strengthen recovery through effective step-down programs including, but not limited to:

- Outreach Screening Assessment and Referral (OSAR) coordination into a lesser intensive, longer-term residential placement; or
- Outpatient care allowing the individual to return home while continuing care and sobriety through Medication-Assisted Treatment (MAT) and/or intensive outpatient substance abuse treatment.

PROJECT DESCRIPTION:

The Withdrawal Management Center will provide medical treatment for persons detoxing from drugs – a process that may have a life-threatening impact. These drugs include alcohol, opioids or sedatives. During detox, withdrawal symptoms are monitored 24-hour by nurses skilled to treat the effects experienced during withdrawal. Withdrawal symptoms may be uncomfortable for some and unbearable for others, requiring medical care to mitigate the effects. After detoxing in a safe environment with constant access to medical care, individuals can safely return to a drug-free state. While detoxing, the patient will reside temporarily at the Withdrawal Management Center providing 24/7 access to medical care as needed along with an intensive program of psychiatric care including individual and group therapy sessions.

Medical treatment safely removes addictive substances from the body while treating potentially dangerous withdrawal symptoms. In addition to detox, medical treatment may be required to treat other issues like sickness and malnutrition that pose a threat to physical wellbeing. After stabilizing physical health, the treatment shifts to deeper psychological issues that underlie substance use.

SERVICE DELIVERY:

While patients temporarily reside at the Withdrawal Management Center, they are free to focus on their

addiction recovery without the triggers, stresses, and distractions of work and home life. Withdrawal treatment typically lasts from 10 to 20 days. The program is individualized according to the assessed physical and psychiatric needs of the patient and includes:

- Comprehensive evaluation by a RN
- Treatment planning tailored to specific needs
- 24-hour nursing supervision
- Medication management, if necessary
- Individual therapy with a licensed professional
- Group therapy sessions with licensed professionals and with peers
- Ongoing review of treatment goals
- Recreational activities supporting wellness and building life balance
- Aftercare and discharge planning

After completing the residential program, the majority of individuals transition to a lower level of care of outpatient care offered by BTCS as well as coordination to programs external to BTCS. For those requiring ongoing residential treatment, BTCS will coordinate admission to a long-term facility.

FUNDING METRICS AND OUTCOMES:

1. Serve 80 individuals with intensive addictions during the first 12 months of operation.
2. Provide appropriate step-down care and assistance for 100% of patients discharged after accomplishing short-term goals while admitted to the Withdrawal Management Center.
3. For persons refusing treatment and seeking to leave the Withdrawal Management Center, 100% will receive a recommended plan with referrals to continue outpatient treatment and will receive follow up contacts within 24 hours, 3 days, and 7 days of leaving the program to ensure community connections are made and the individual is welcomed to return to the program.
